

Dear President Tim Keith,

The San Antonians for Sustainable Transport have been around since 2016 advocating for sustainable transit, especially rail transportation into the Central Texas region. We are comprised of more than 340 online members who are currently active in the organization. We encourage our participants to attend city meetings in regards to the future of transportation in San Antonio, and our slogan is "Stay informed and Stay involved." We believe that having a sustainable transportation system is an integral part of any urban society, and the key to success in any city.

On behalf of the San Antonians for Sustainable Transport, we are eager to offer official support for the Dallas to Houston Bullet Train project. We believe that this project will bring tremendous positive economic impact to the state both directly and indirectly. We applaud your efforts on bringing high-speed passenger train service to Texas.

SAST also believes if the high-speed rail is properly implemented, with connections available at the Dallas, Grimes County and Houston stations, this venture will be successful and an economic boom for Texas. A strong multi-modal connection is an important economic stimulate for all the cities involved. SAST believes in sustainability, and as such are thrilled that the train is going to run on electricity. We hope that TCR will consider the use of renewable power to power the trains and stations. Thank you for all you are doing, and keep up the good work!

Sincerely
